MINES

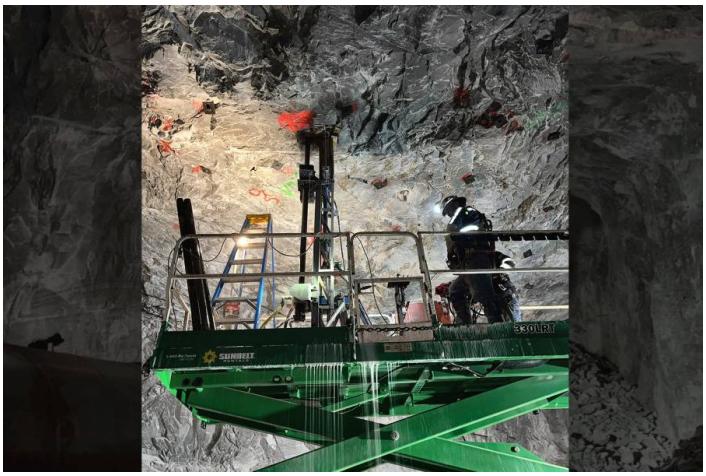

Arcosa Lake Lynn Limestone Mine, Pennsylvania

DA Smith drilled multiple HQ core holes at Arcosa Aggregate's Lake Lynn underground limestone mine located in southwestern Pennsylvania.

CLIENT	LOCATION	YEAR	WORK
Arcosa Aggregates	**Lake Lynn, Pennsylvania**	**2026**	**Mines**

DA Smith completed multiple HQ core holes at Arcosa Aggregates' Lake Lynn underground limestone mine in southwestern Pennsylvania. Drilling was performed from a 30-foot scissor lift using DA Smith's lightweight LA-100 aluminum-framed, electric-hydraulic drill rig. This compact drilling system provided efficient access to elevated roof drilling locations within the mine, achieving excellent core recovery.
